

MPTCP api with java

Demaude Guillaume, Ortegat Pierre
<https://github.com/reirep/matcp-java.git>

Usage

- Normaly use the socket in java or any class that use a socket
- We've add a few methods to play with the socket and mptcp

List of methods

- `public static int closeSubflow(Socket sock, int subId, int how) ;`
- `public static int[][] getSubflowList(Socket sock) ;`
 - `public static HostTuple[] getSubflowTuple(Socket sock, int subid) ;`
 - `public static int openSubflow(Socket sock, HostTuple source, HostTuple dest, int priority) ;`
